

Database Setup

Table 1: Users

Stores the unique identity of the people playing.

- `user_id` (Primary Key)
- `username`
- ...
- `created_at`

Table 2: UserSettings

Don't put settings in the `Users` table. By keeping them separate, you can add new features (like voice speed or magnet strength) without breaking the login logic.

- `user_id` (Foreign Key linked to Table 1)
- `motor_speed` (Fast/Medium/Slow)
- `voice_enabled` (True/False)
- `ui_theme` (Dark/Light)
- ...

Table 3: Games

Stores the metadata for a match.

- `game_id`
- `white_user_id`
- `black_user_id` (Could be "AI")
- `start_time`
- `end_time`
- `result` (White won / Black won / Draw)

Table 4: MoveHistory

This is where the actual "film" of the game lives.

- `move_id`
- `game_id` (Foreign Key linked to Table 3)
- `move_number`
- `notation` (e.g., "e2e4")
- `timestamp`

Table 5: Graveyard

Which space on the side of the board is already occupied

- `game_id`
- `side_space_coordinate`
- `occupied`
